

Certificate

This is to certify that Jiarui Jin in Computer Science and Technology Major of Yingcai Honors College of UESTC, ranks 2nd among a total of 287 students in the major.

Yingcai Honors College of UESTC

2018-4-13

Note: Yingcai Honors College is a four-year elite undergraduate program of University of Electronic Science and Technology of China (sponsored by the national programs "Project 211 and 985"). Students here represent a diversity of academic backgrounds spanning all majors in computer science and electronic engineering on campus. According to U.S. News 2017th, UESTC is ranked 54th in Computer Science and 94st in Engineering, globally.

Students in grade 2019 of Yingcai Honors College are 96 top students selected from about 4000 freshmen based on their scores in National College Entrance Examination and performance in interviews.

Yingcai Honors College takes full advantage of UESTC's strong disciplinary resources in computer science and electronic engineering to cultivate students with solid fundamental knowledge, outstanding practical ability, high comprehensive quality, global vision and competitiveness. Yingcai Honors College adopts independent education system. In the first two years, students focus on acquisition of an extensive and solid basis in mathematics, physics and core courses in the fields of computer science and electronic engineering. During the second part of the program, students can choose professors in the fields they are interested in as their supervisors so that they can complete their undergraduate program under their guidance and prepare for their further education programs and researches.

*All the instructors of major courses are distinguished professors on campus;

*The textbooks and teaching materials are almost original English editions;

*The assessment criteria are higher than those of ordinary classes;

*All graduates are qualified for admission to graduate waived of National Entrance Examination.
